

# President's Message

February 1, 2006

Greetings to environmental and engineering geologists of the Inland Empire. It is my pleasure to serve as president of the Inland Empire Chapter of AEG in 2006. Planning for the chapter began in the spring of last year. AEG National officially recognized the Chapter in September of 2005.

There has been tremendous interest in the Chapter by geologists throughout the Inland Empire. Meetings have been well attended and a number of volunteers that have stepped forward to help with planning and operation of the Chapter. The success of the Chapter depends upon the interest and participation of members. Your ideas and suggestions are welcome.

You do not have to be a member to attend meetings and students are particularly welcome. I look forward to continued growth and success of AEG Inland Empire. If I fail to greet you at a meeting, please feel free to introduce yourself. See you at a meeting in 2006!

Cordially,

Gary Wallace  
2006 President  
AEG Inland Empire
