MONTHLY DINNER MEETING

Date: Tuesday, October 8, 2002
Location: Stevens Steakhouse, 5332 Stevens Place, Commerce, CA
Time: 5:30 p.m. - Social Hour; 7:00 p.m. – Dinner; – 8:00 p.m.
      Presentation
Reservations: Call (949) 253-5924 ext. 564 by 5:00 p.m., Monday,
             October 7, 2002
Cost: $25.00 per person with advanced reservations, $30.00 at
      the door, and $10.00 for students w/ valid I.D., "No-
      shows" will be billed $10.00

SPEAKER: Mark G. Olson

TITLE: Recent Examples of Seismic Reflection and Refraction Surveys
      for Southern California Engineering Geology Projects

ABSTRACT: The results of various seismic reflection and refraction surveys
will be presented. These case histories will demonstrate the application of seismic
methods for subsurface imaging of shallow lithologic contacts and changes in geologic
structure associated with faults. Case histories will also be presented to show how
seismic velocity profiles were used to investigate bedrock rippability and other
technical conditions.

BIO: Mr. Olson is a RGp, RG and CHG, and Principal Geophysicist of
Advanced Geoscience, Inc., Palos Verdes Estates, CA. Mr. Olson
is a consulting geophysicist specializing in subsurface inves-
tigations using seismic, ground-penetrating radar, and
electrical resistivity techniques.

Since 1997, he has performed geophysical services for local
engineering and environmental consulting firms. Prior to
starting his own company he was a senior geologist and
geophysicist with Dames & Moore in Los Angeles and a former
exploration geophysicist with Mobil Oil Corporation.
Greetings from your new Section Chair! This past September, a new slate of officers for the Section was voted in. Please welcome Matt Hawley, who stepped right up to the plate and volunteered for the Vice-Chair position; Brian Villalobos, the new Treasurer; and Jeff Kofoed, who has agreed to continue his Secretary, Newsletter Editorship duties. Joe Kota, Buzz Spellman and Hugh Robertson will continue to volunteer on the legislative front – it take a lot of effort to keep up with the proposed new Assembly or Senate Bills that directly or indirectly would have an impact on how and who can practice geology in California. We will keep you informed of these proposed changes via e-mail as particular issues develop. If you have not given us your e-mail address, please consider doing so. By sending the newsletter via e-mail rather than snail mail, the Section can save a substantial amount of money that is otherwise spent in printing and postage costs.

Dave Seymour, our past-Chair, and Lorraine Muto, past Vice-Chair, have retired. Please join me in thanking them both for all their years of service and leadership. The time commitment to these positions is substantial, but as Dave tells me, it is intensely gratifying. I do hope that we continue to see you both at meetings. Dave says that he plans to continue giving his time and energy to the association. Thanks Dave!

As the incoming Chair, I represented the Southern California Section of AEG at the Annual Meeting in Reno, where the Board of Directors and Executive Council of AEG met for two days to discuss the past, present and future of the organization. It is official: AEG has moved its offices from Texas A&M University (TAMU) to Denver, Colorado. If you are in the Denver area, stop by and check the new offices at 720 South Colorado Boulevard, Suite 970-South. The day-to-day business of AEG is now being handled by the National Environmental Health Association (NEHA), a firm that provides management, financial, and administrative services for organizations like our own. Starting in July, when AEG signed their contract, NEHA took the bull by the horns and has made an excellent job of transferring, sorting and updating all of the records that came out of Texas. If you have any problems with your membership dues, publications, or directory services, please let me know, as NEHA is committed to taking care of any problem of this type immediately.

NEHA’s representatives were present at the Annual Meeting, where they provided support to Julie Keaton. Thanks to Julie’s wonderful administrative skills, the Annual Meeting was again a success. Approximately 640 people and 39 exhibitors attended the meeting in Reno. There were several symposia, covering issues like faulting, liquefaction, landslides, gas hazards, monitoring and remediation of solid waste facilities, Site Characterization, the Yucca Mountain project, the practice of Engineering Geology, and Geology as a Profession. All of these symposia were well attended; the challenge was to pick the right talk out of the two or three interesting ones that were being given at the same time! If you have not gone to an Annual Meeting, consider going to next year’s meeting, which will be held in Vail, Colorado. The field trips alone are a great experience, but these meetings are also a wonderful opportunity to network and learn more about our profession.

The move to Denver, and transfer of the management services to NEHA were prompted by the need to curb the expenses of the Association. With these changes and other cost-cutting measures, the Executive Council expects to save approximately $80,000 a year. You can help AEG achieve financial stability by paying your dues early (you should have already received your invoice for the 2003 dues), in addition to making a contribution to the AEG Foundation. AEG Foundation monies are used to support educational projects of the association, such as scholarships, guest lectures and publications. For additional information regarding the state of the AEG, read the President’s message in the upcoming (September) issue of AEG NEWS.

If you have any comments or comments regarding the AEG, both at the National or southern California level, please give me a call or drop me an e-mail. As usual, we are always looking for volunteers. For example, it has been several years since the Southern California Section has put together a field trip. I would like to start holding these again on a regular (yearly or every other year, at least). If you have ideas, do give me a call.

Do not forget to check out the AEG web page at http://www.aegweb.org. If you use your membership ID and password (on the membership card we each get annually from National), you can access several different member services, including the more recent member directory. In the next month or two, we should also be able to order publications and pay our annual dues online.

Legislative News

After some research by Woody Higdon and our lobbyist, the tax deductibility of lobby expenses has been determined. If you are lobbying the legislature about a bill that is directly related to the organization’s purpose, then the dues are deductible by the members in total. If you are lobbying for something that is not directly related to the organization’s purpose either directly to the legislature or through advertising to the community (i.e., lengthen terms of office for representatives) then
you would have to declare to your members what portions of their dues are not tax deductible.

Joe Cota, our Legislative Chair, along with Hugh Robertson and Buzz Spellman have been busy reviewing several bills recently identified by our lobbyist, Judy Wolen. An update on legislative affairs will be provided in upcoming newsletters, as much of the evaluation is still in progress.

Electronic Newsletter and Website
We are attempting to reduce the Section's budget for the newsletter (more than half a member’s dues paid to the Section go to Kinko’s and the Post Office). Please consider receiving the newsletter electronically if you have an email account. Contact Jeff Kofoed.

2003 MEMBERSHIP RENEWAL

You probably received your 2003 dues statement from AEG National by now. If you have not received it, or are unsure about your membership status, please contact AEG Headquarters aegweb.org, or Tania Gonzalez. We are currently looking for a new Membership Chair. Please contact Tania Gonzalez you wish to volunteer.

YEAR 2002 CONTRIBUTORS

Our special thanks to:

Earth Consultants International
Robertson Geotechnical, Inc.

YEAR 2002-3 CONTRIBUTORS NEEDED

Contributions from corporations and individual members for 2002 are greatly appreciated. Contributors will be listed in our newsletter throughout the year and can post their logo or business card in the newsletter if so desired. Please mail contributions made out to AEG to our section chair, Tania Gonzalez.

Haley & Aldrich, Inc.

Haley & Aldrich, Inc. is seeking the following staff to serve prestigious industrial clients on interesting environmental projects in their Brea, CA (East Los Angeles) office:
Civil, Geological, or Environmental engineer (4 to 5 years experience)
CA Registered Geologist (5 to 6 years experience)
Toxicologist (2 years experience)
Senior Geotechnical Engineer (7 to 8 years experience)

Interested parties should email resume, statement of qualifications and career interests to Travis Hammond, TSH@HaleyAldrich.com

Ralph Stone & Company, Inc.

Ralph Stone & Company, Inc., an established west Los Angeles geotechnical, environmental and civil engineering firm, is seeking a Project Engineer with a minimum of three years experience in hillside geotechnical engineering. A Masters Degree/relevant class work is desirable. We are also seeking a Project Engineering Geologist, Registration required. We offer competitive salaries, benefits and a cordial environment. Equal Opportunity Employer.

Ralph Stone & Company, Inc.
Attn: Jim Rowlands
10954 Santa Monica Boulevard
Los Angeles, CA 90025
**Petra Geotechnical, Inc.** is an established company for over 27 years with 5 offices throughout southern California. We are currently seeking to fill the following positions:

Qualified civil, geotechnical and environmental engineers, geologists, and technicians in the fields of geotechnical and environmental engineering, materials testing, and special inspection for all office locations.

An individual who is a registered civil/geotechnical engineer or engineering geologist with 10+ years of relevant experience in land development to fill the position of Office Manager at our Los Angeles County Office.

Please send resume to:
Jeanne Krinsky

LGC is looking for dynamic individuals to join our team and work on some of Orange County’s most interesting and technically challenging projects. If you are an experienced geotechnical professional, or just starting your career, please do not hesitate to contact us. All inquiries will be considered in the utmost confidence. We look forward to hearing from you.
An Employee-owned Company

Senior Geotechnical Engineer/Senior Geologist

Kleinfelder is an ENR “Top 70” engineering consulting firm specializing in earth, air, and water sciences, including geotechnical engineering, engineering geology, materials engineering and testing, environmental engineering and science, and construction management. We are seeking motivated senior level professionals to assist in our growing Inland Empire Market. The available positions will involve staff supervision, business development and project management. Qualified candidates should have 5 years of progressively responsible experience in the consulting arena and possess a CE, GE or CEG registration in the State of California. We are interested in dynamic and motivated individuals with the leadership skills to grow within an expanding operation. We offer an excellent compensation package commensurate with experience. All inquiries will be held in strict confidence. We are a fully employee-owned company serving the western United States. Please submit resume and letter of interest to:

KLEINFELDER, INC.
1940 Orange Tree Lane
Redlands, Ca. 92374

Douglas E. Moran, Inc

ENGINEERING GEOLOGY
SOIL ENGINEERING

Do you need reliable results of soil tests that you are not equipped to perform or do not have time to perform? Consider asking Douglas E. Moran, Inc. to perform the tests for you. They maintain a laboratory equipped to perform most tests (A.S.T.M., U.B.C., or CALTRANS) and you can always rely on the results. They are willing to perform long-term tests that may be inconvenient to perform in a laboratory that is too busy to allow testing machinery to be tied up for the length of time those tests may require. For your consideration, the following is a list of some of the conventional soil tests that they are equipped to perform.

Remolded and/or Undisturbed:

Consolidation      Hydrometer Analysis
Consolidation Plus Time Rate Liquid Limit, Plastic Limit, Shrinkage Limit
Direct Shear       Moisture/Density (undisturbed)
Residual Shear     Maximum Density
Expansion          Sand Equivalent
Expansion Index    Specific Gravity (soil and rock),
Grain Size (Full Sieve Set)  Swell or collapse (remolded air-dry, HUD)

Feel free to call and ask for Doug Moran or Rick Herrera at (714) 544-2215, Fax (714) 544-7395.
MASTERPIECE ROCKS & FOSSILS
Specializing in Décor for Home, Office And Gifts
